SUMMARY

Software Development graduate with professional experience building and supporting web applications using JavaScript, React, HTML, CSS and Python. Strong foundation in software engineering, networking, concurrent development, databases and Agile development, with practical experience testing, debugging and resolving technical issues. Comfortable learning unfamiliar technologies and working collaboratively across engineering and business teams. Particularly interested in software engineering, developer tooling, Linux systems and building reliable software that solves practical user problems.

EDUCATION

SETU (South East Technological University)

BSc (Hons.) Software Development, Relevant modules:, Concurrent Development, Data Science, Agile Software 2020 – 2024 Development, Networking (Cisco)

EXPERIENCE

Junior Software Developer

March 2023 – September 2023

SimLocal

Dublin, Ireland

- Developed and improved web applications and customer-facing experiences using JavaScript, React, HTML and CSS.
- Worked collaboratively with engineering, design and marketing teams to deliver software aligned with user and business requirements.
- Investigated, tested and resolved technical issues, developing a structured approach to debugging and problem solving.
- Worked with APIs, payment capabilities, analytics tools and third-party services as part of production software.
- Contributed to maintaining documentation and following structured development processes.
- Worked across technical and non-technical teams, communicating issues and requirements clearly.
- Applied attention to detail when testing functionality and investigating issues affecting users.

Shop Assistant

2026 – Present

Circle K

Ireland

- Provide customer support in a busy environment, responding to questions, resolving issues and prioritising customer needs.
- Remain organised and reliable while managing multiple responsibilities during busy periods.
- Follow security, operational and procedural requirements when handling transactions and workplace systems.
- Use digital systems confidently and adapt quickly to new processes and technology.
- Communicate effectively with colleagues and customers to resolve problems and maintain efficient operations.

Shop Assistant / Sales Assistant

January 2022 – 2025

- Provided day-to-day customer support, answering questions and resolving issues through clear and professional communication.
- Used Microsoft Office and Monday.com to organise tasks and support daily operations.
- Worked collaboratively with colleagues during busy periods while prioritising tasks and meeting operational requirements.
- Supported events and larger-scale activities involving customers, suppliers and other stakeholders, resolving issues as they arose.
- Developed strong organisational, interpersonal and problem-solving skills through a customer-facing environment.

PROJECTS

SwiftLift — Fitness & Nutrition Web Application | Python | SQL | JavaScript

- Developed a personal web application combining software development with fitness and nutrition functionality.
- Worked with Python, SQL and JavaScript to implement application functionality and manage data.
- Designed the application around practical user requirements and usability.
- Used independent development and debugging to identify and resolve implementation issues.

Personal Software Development / Technology Projects

- Continued developing software projects independently outside university coursework, strengthening practical programming, debugging and problem-solving skills.
- Used personal projects to explore technologies and build familiarity with software development beyond formal academic requirements.

TECHNICAL SKILLS

Programming: Python, JavaScript, Java, SQL, HTML, CSS

Frameworks & Development: React, Node.js, REST APIs, Web Applications

Software Engineering: Debugging, Testing, Problem Solving, Documentation, Agile/Scrum, Concurrent Development

Tools & Platforms: Git, Microsoft Office, Monday.com, Salesforce

Networking: Networking fundamentals, Cisco

Professional: Technical communication, teamwork, customer support, issue resolution, organisation, accountability

ADDITIONAL INFORMATION

- Professional written and spoken English - Available for international travel and company events - Interested in software engineering, Linux systems, developer tooling and open-source technologies - References available on request
